

# PERSONALITY PROFILING

Clarity4D personality profiles offer a development process which creates positive results in personal and professional relationships.

- Simple to understand
- Affordable for all budgets
- Effective at getting results

## What is Clarity 4D Personality Profiling?

Clarity 4D is an online questionnaire designed to help you understand yourself, your staff, your customers, your suppliers, your friends and your family.

- Discover how you see yourself
- Discuss others perception of you
- Diversify your hidden potential
- Develop your full potential over time

We all have a mix of 4 colour energies within us and the Clarity4D Profile identifies the energies we prefer to use, and those with which we are potentially less comfortable.

Personality profiling gives you the opportunity to learn more about how yourself and those around you.

*We believe that colour creates a common language.*

## How does it work?

You complete an online questionnaire which will provide you with your own tailored personality profile report.

If you really want to know what others think of you then you can ask others to complete the same questionnaire on you.

Profiles can be used for personal development and bespoke workshops including:

- Leadership and Management Development
- Personal Development
- Business Coaching
- Customer Service Workshops
- Sales Workshops
- Team Development Workshops
- Appraisal Workshops
- Bespoke Workshops

"Thank you very much for the workshop Angela. The Clarity4D profiling was really useful in helping us to structure the team to move forward with our new sales and marketing strategy. I would recommend this workshop to anyone who is looking to implement new processes"

- Karen Sallows - Director of Crown Vocational Training
